

Identity Security Insights 23.09 Release Notes

September 5, 2023

New Features and Enhancements:

- Connector Activity History has been added to the Connector Details page. The Activity History provides a view of the state of each connector, historical events, successful data retrieval, and error messages.
- Splunk integration: Detection and Recommendation events can now be sent to your Splunk SIEM solution.
- Organization subscription information is now available in the organization dashboard, including start and end dates, and expiration countdown notifications.
- Detection and Recommendation previews provide high-level incident details in a right-hand slideout without leaving the current screen.

Issues Resolved:

- Resolved an issue where the Recommendation Details - View Description dropdown did not appear.

Known Issues:

None.

Notes:

None.
